## Types of Dictionaries

A dictionary is a reference book that contains words listed in alphabetical order and that gives information about the words' meanings, forms, pronunciations, etc.

There are usually three types of dictionaries:

**Unabridged dictionaries:** When a dictionary is unabridged, it contains almost every word in the English language. Such dictionaries are very big and expensive. Some examples could be *Random House Webster's Unabridged Dictionary (Second Edition)* and *Oxford English Dictionary (OED)*.

**Abridged Dictionaries:** An abridged version of a dictionary is a shortened version: it's not complete because words have been cut or omitted. It's cheaper and easier to read. A good example for this type of dictionary is *Merriam-Webster's Collegiate Dictionary (Tenth Edition)*.

**Online Dictionaries:** An online dictionary is a dictionary that you can use via the Internet through a web browser. Here is a list of well-known online dictionaries:

1. Merriam-Webster's Learner's Dictionary (<http://www.learnersdictionary.com>)
2. Oxford Learner's Dictionaries ([www.oxfordlearnersdictionaries.com](http://www.oxfordlearnersdictionaries.com))

## Understanding Entries: Definition

**Note:** A dictionary entry is the information about a word in a dictionary.

Most words have more than one meaning. When there is more than one definition, meaning is numbered. Dictionaries can also sometimes give the synonyms (words that mean the same thing as your word) and the antonyms of a word (words that mean the opposite of your word). Most dictionaries provide examples of sentences in which the word is used. At the following example:

**driver** /'draɪvər/ *noun*

1. a person who drives a vehicle  
*a bus/train/ambulance/taxi driver*  
*She climbed into the driver's seat.*  
*The accident was the other driver's fault.*  
*The car comes equipped with a driver's airbag.*
2. one of the main things that influence something or cause it to make progress  
*Housing is a key driver of the economy.*  
*Young people are widely perceived as the big pop industry drivers.*
3. (in golf) a club with a wooden head
4. (computing) software that controls the sending of data between a computer and a piece of equipment that is attached to it, such as a printer

If you are not sure which one is correct, check through all the meanings and find the one that makes most sense in the context where you found the word. (Very often, many of the different meanings are similar and this should be enough to give you a good idea what the word means.)

**Exercise:** Three definitions are given for the word *degree*. In the space provided, write the number of the definition that best fits its meaning in the sentence.

- a. a unit for measuring temperature
- b. a unit for measuring angles
- c. the amount or level of something

- .....D..... 1. There are 360 degrees in a circle.  
 .....C..... 2. Her job needs a high degree of skill.  
 .....A..... 3. Water freezes at 32 degrees Fahrenheit or zero degrees Celsius.

Was the mold killing the bacteria? Dr. Fleming prepared some medicine with the mold and gave it to the little girl. It made her well. He named the new medicine penicillin. Doctors now use penicillin to treat many different diseases. Dr. Fleming's discovery is helping millions of people in the world.

## Guide Words

Guide words appear on each page of a dictionary. They tell you the first word and last word on the page. The other words on the page come between the guide words in alphabetical order. To put words in alphabetical order, put them in order by their first letters. If the first letters are the same, look at the second letters. If the second letters are the same, look at the third letters, and so on. If one word is shorter, and there are no more letters to compare, then the shorter word comes first in alphabetical order. For example, *be* comes before *bed*.

**Exercise: Answer the following questions.**

1. Would you find the word **clump** on a dictionary page with the following guide words?  
*cement - collection* **yes**

## Guidelines on the Remedial Tests

The remedial tests serve two purposes. First, they give you a general idea of how well you have learned the materials in the Student's Book, and second, they make you familiar with the question types and overall format of the final exam. Read the following points carefully before taking the tests.

1. Make sure you have studied all units of the Student's Book completely before taking the tests.
2. There is an answer key along with explanatory answers at the end of the Workbook. This will help you check your answers and find the problematic areas, if any.
3. Each test consists of the following parts, number of items, and the related points:

	Parts	Number of items	Points
I	Listening Comprehension	10	20
II	Vocabulary & Pronunciation	20	30
III	Grammar & Functions	20	30
IV	Reading Comprehension	10	20
		Total items: 60	Total points: 100

4. Note that each item in "Listening Comprehension" and "Reading Comprehension" parts has 2 points, while the rest of the items have 1.5 points, each.

A minimum score of 75 is needed in order to pass the course. So, if you get a score around 75 or below, it shows that you need to find your problematic areas and work on them before you take the actual final exam.
